New DOOIT™ Trailer Offers An Economical, Fuel Efficient Way To Transport Passengers And Your Outdoor Toys

Anthem, Ariz. — Don't let the rising cost of fuel put a cramp in your outdoor recreation plans this summer. The new DOOIT Trailer from Activity Trailer, LLC lets you hit the road with all your favorite toys without sacrificing fuel economy. Designed for towing behind today's economical sub-compact vehicles, the DOOIT trailer can easily carry bicycles, kayaks, camping gear and other recreational equipment.

There is no need to rely on gas guzzling trucks and SUVs to provide enough space for bulky items and passengers. The DOOIT Trailer also eliminates the need for roof racks that can reduce fuel economy by as much as 7 mpg. When towed behind sub-compacts there is little effect on gas mileage and fuel economy.

The key to the DOOIT Trailer's versatility is its tubular design that will accommodate the accessory racks, carriers and cargo boxes offered by Thule and Yakima. This provides the flexibility to carry a variety of bicycles, canoes, kayaks and other gear boxes. Loading toys and gear is also easier with the DOOIT as compared to the effort of hoisting heavy loads onto traditional roof racks.

The DOOIT trailer has an overall width of 55 inches and length of 96 inches. It is designed to fit within the slipstream of most sub-compact and other small cars. With a gross vehicle weight (GVW) of 500 lbs. it will safely tow all the gear that four people would need for a week or a weekend. The mounting crossbars measure 52 inches across providing enough room for up to four bicycles. An optional tongue extension will extend the overall length by 3 feet in order to carry two 14' kayaks and two bicycles, or a single 15' kayak or canoe and two bicycles.

Extremely durable, the DOOIT trailer is constructed with a welded tubular steel frame. The frame is bumper height to most cars for better protection. A torsion bar axle and suspension adjusts to any load for smooth towing. Unlike most small trailers, the DOOIT has Bearing Buddy lubricating hubs that eliminates the need to disassemble the axle bearings for maintenance. The powder-coated paint finish is chip and fade resistant for protection from the elements and corrosion.

The trailer has a 5-year warranty on parts and service with the exception of tire and wheel bearings. The DOOIT Trailer is available as a base trailer or with a selection of packages with various accessory racks and gear boxes. Prices start at \$1,495.

For more information on the DOOIT Trailer and the location of the nearest dealer, visit the company web site at www.activitytrailer.com, or call 602-324-9664.
